

Danskudviklede computerspil

Denne liste indeholder oplysninger om alle de danskudviklede computerspil, som er kendte af Det Kongelige Bibliotek, samt oplysninger om, hvorvidt materialerne indgår i bibliotekets samlinger.

Listen er i det store hele identisk med oversigten DKGames

(<https://docs.google.com/spreadsheet/ccc?key=0AqarukOuwoNKdEg5U1E0Z3VXb3BINERHWm5XMWYweEE&authkey=CIWlorkK&hl=da>), der blev startet af Bo Abrahamsen og nu føres videre hos spiludvikling.dk

Hvis du kan bidrage, enten med tips om nye spil til listen eller med donationer af spil, som Det Kongelige Bibliotek ikke er i besiddelse af endnu, er du meget velkommen til at henvende dig til Det Kongelige Bibliotek på spil@kb.dk

Listen er senest opdateret mandag 3/9 2012

Vær opmærksom på, at beholdningsoplysningerne ikke er fuldstændig opdaterede for spil, der er under 1 år gamle. Det skyldes bibliotekets periodiske leveringsfrister for hhv. pligtafleverede og nethøstede computerspil. Bemærk også, at det ikke er alle spil, som kan fremsøges i KBs søgesystem REX. Det skyldes bl.a. at nethøstede materialer ikke katalogiseres selvstændigt. Bemærk også, at de fleste af manglerne skyldes tre forhold: Spillet er ældre end 1998 og falder dermed udenfor pligtafleveringsloven, spillet er udgivet til mobile devices (iOS og Android) som p.t. af tekniske årsager ikke indsamles eller spillet er udgivet online på en måde, der umuliggør indsamling via nethøstning.

Antal:

570
