Open Access publishing options: Danish institutions associated corresponding authors
Key information
Agreement between Elsevier and the Royal Danish Library National License Consortium
(The Current Agreement 2021-2024)

1. How do we determine eligibility of the article for the Danish agreement?
   • The submission date of the article should be on or after 1st January 2021
   • The corresponding author must be from a Danish participating institution
   • The article must be from a participating journal (see full list here).

2. Why do we use submission date as the eligibility criteria?
   • The submission date is the only stable point in the publishing process
     Acceptance and publication dates vary based on the journal processes
   • The author controls the submission date. This gives the author not just control, also transparency and predictability however long or short the journal will take for the review and publication process
Corresponding author receives an email post acceptance with a unique link to complete the author journey and choose publishing options.

• Corresponding author selects his/her affiliation details which we use to identify the authors and match them to the Danish agreement

• In this example author chooses University of Copenhagen
Corresponding author also adds the co-author affiliation details
Author can add the Funder details if needed. Funder information is needed when author has received research funding.

For the Danish agreement, we only use the corresponding author affiliation to present the agreement.
• Based on the affiliation details, the author sees the Publishing Options. Gold OA option is followed by Subscription option and we make it clear that the agreement covers the full publishing fee (APC).

• If the librarian at the consortium rejects the author request in the Elsevier OA Platform, we also make it clear that the authors will receive a full price invoice.

• Gold OA is pre-selected and recommended.
• In case of Gold OA, author selects the CC License
